

RETX + Schneider Electric – Growing Together

We're happy to announce that on July 28th, the assets of RETX were acquired by Schneider Electric, so we are joining the Schneider Electric family of companies as part of its Power Monitoring and Control (PMC) activity.

Schneider Electric is a global company that specializes in energy management and energy efficiency solutions, so it is a natural fit with RETX's ongoing dedication to helping our customers reduce energy costs, ensure system reliability and manage energy assets. Both organizations are very excited about the opportunities this provides – both for growth and for offering better solutions to our customers.

While we are joining Schneider Electric, our business will continue to function as usual with no immediate change in contacts or processes. You will continue to receive the same level of service and support as always. Both Schneider Electric and RETX have a history of excellent customer service, so it's our goal to maintain this reputation through the acquisition process and beyond. Please let us know if there is anything we can do to serve you better.

If you have questions or concerns, or would like more information about the acquisition, please contact us at 1-888-228- 7389 or by email at rmalme@retx.com.
